About This Content

CPUC⬛RES
System Hardware Analyzer

CPUCores is a cutting-edge Windows based software built by gamers, specifically for gamers, with 1 thing in mind:
INCREASE YOUR FPS!
CPUCores does this by micromanaging your Windows OS and non-essential applications.
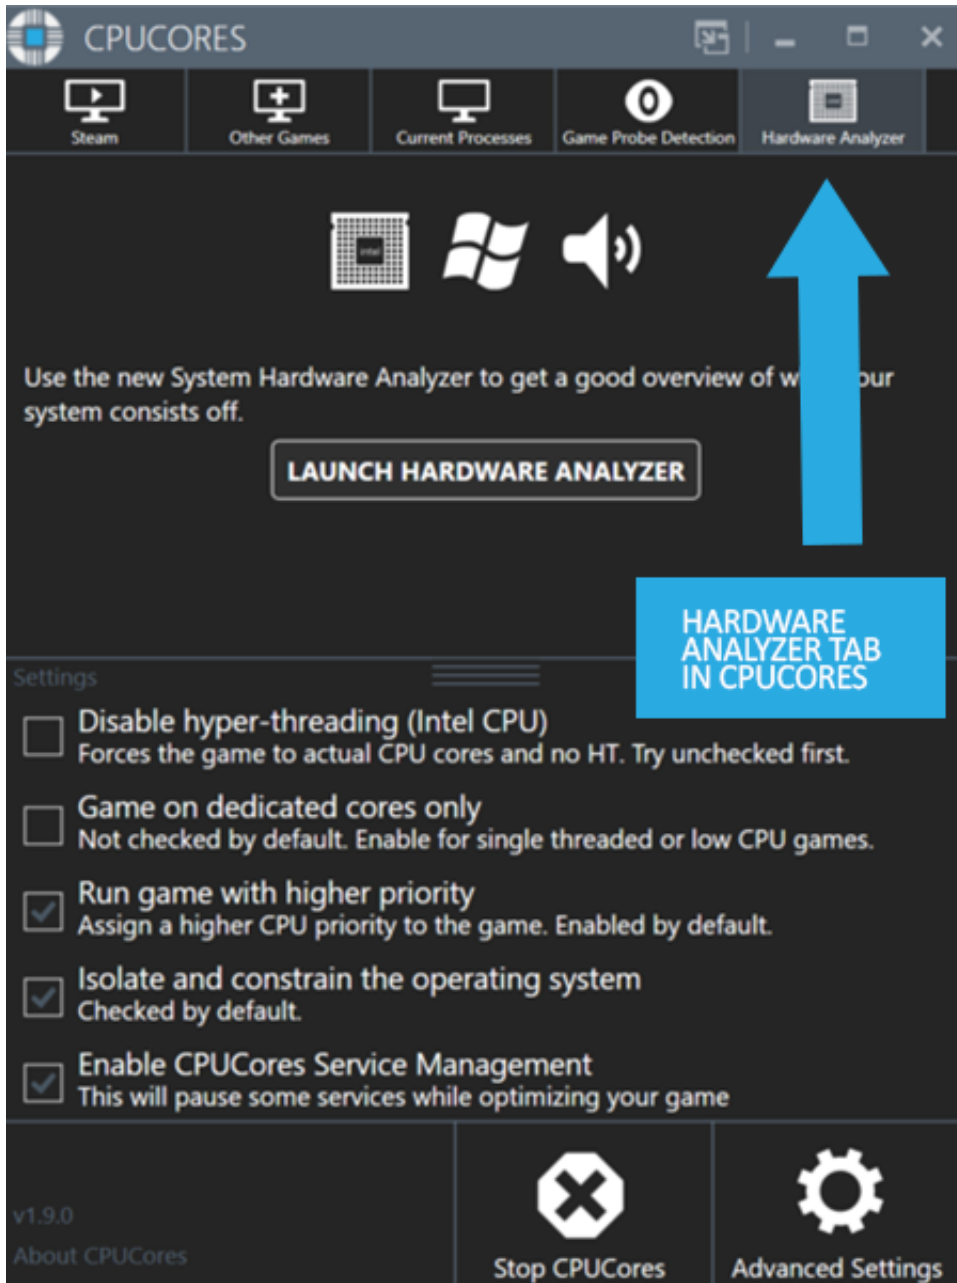

DESCRIPTION

Hardware Detection 🔍

CPUCores System Hardware Analyzer will automatically detect and display a summary of your computer's hardware specifications.

Save/share your specifications! ◄

With only one click you will be able to create a PNG image of your specifications or copy them to clipboard.

This gives you a great way to share your specifications on your profile, tweet the image, share it on Facebook or even post them on Reddit, Imgur, etc!

Use the new System Hardware Analyzer to get a good overview of w___ ___ur system consists off.

LAUNCH HARDWARE ANALYZER

HARDWARE ANALYZER TAB IN CPUCORES

Settings

☐ **Disable hyper-threading (Intel CPU)**
Forces the game to actual CPU cores and no HT. Try unchecked first.

☐ **Game on dedicated cores only**
Not checked by default. Enable for single threaded or low CPU games.

☑ **Run game with higher priority**
Assign a higher CPU priority to the game. Enabled by default.

☑ **Isolate and constrain the operating system**
Checked by default.

☑ **Enable CPUCores Service Management**
This will pause some services while optimizing your game

cpucores + system hardware analyzer (dlc) bundle. cpucores system hardware analyzer

This game is amazing for the price! Great bullet hell and even 1 hour is worth the price!
. good game short as♥♥♥♥. Not recommended, the game is incredible good, has a interesting history, likeable characters, superb voice acting and animation ,the puzzles are challenging,I admit the game don't work too well in modern OS, but I put a guide so people can make it work with easy ,I use a windows 10 and I get it to work with all the cuteness, I even finished it ,the only problem is that the game was minded to be composed of 4 episodes, and this is only the first ,it has a good length you will spend a lot of time in this ,but to expend hours in a game and its end in a cliffhanger, and when you check it on Facebook they say the sequel is on hold, is simply disrespectful!!! I expect that they enjoy my money that I put in the game in the hope that its a full game ,don't put this type of information was dishonest and a bad customer service ,shame on you guys.... Really good HOG. Nice and well written story with quite some humorous elements. It was definitely worth the money.. This game makes me question if I'm still alive.
10/10 would recommend. Runespell: Overture was fun. It reminds me a lot of PuzzleQuest, except matching blocks was replaced with competitive solitaire. Build those those trips, quads, and boats to attack the enemy. There's also spells and other typical RPG trappings. Good stuff. It's the first chapter of a larger story. It wasn't that long and the game abruptly ends.

This is my favorite Steam Games. It's simple and addictive. Much better than the sequel. All WWII Pacific Theater buffs will love this. It was unavailable for purchase for a while there, but it is back, hopfuly to stay!. I dislike the photo realistic images; wheres the fun in spending hours on changing colours every second?. If you want the classic indie Xbox 360 game but improved gameplay compared to the original game, this is your game. 8 player multiplayer and a creative map making mind can make a great time in your world. You can drive locomotives of Steam, Diesel, and Electric, you can drive cars and there's crates that can get you more automobiles if you get a train to go through them. On a 1-10 rating I'd give this game a 8/10, the game needs more locomotives and more city and industrial props but other than that the game is really good.. I have bought the spatials and the galactology second game. I decided to play the base game first. It is very very very very repetitive. It is a cute game and is good for killing a few hours. I found it a little difficult at first as the tutorial does not seem to actually cover much, and then you realise that if you click on every tab, every tab comes with it's own tutorial ... so for new players click on everything.

I am hoping that the galactology game will add more to it, as after 7 hours I don't feel that there is much more to explore. There is obviously more things to find and different chemicals to build but it just seems so bleh!

I will load the galactology game and see if that gives you more.

I must admit to so far being dissapointed, this is at best an app.. If you like the horror genre, intriguing settings and puzzles, and the building sense of fear and dread that a "FPS" or VR environment can offer, definitely recommend the creep factor of Bring to Light! I don't even have a fit bit for the game to take advantage of my biometrics and its still unnerving moving through the game! Constantly looking over my shoulder! Definitely worth a go!
